Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to nucleic acid encoding the lipase of SEQ ID NO: 2, classified in class 435, subclass 252.33.
- II. Claims 1-32, drawn to nucleic acid encoding the lipase of SEQ ID NO: 4, classified in class 435, subclass 252.33.
- III. Claims 1-32, drawn to nucleic acid encoding the lipase of SEQ ID NO: 6, classified in class 435, subclass 252.33.
- IV. Claims 1-32, drawn to nucleic acid encoding the lipase of SEQ ID NO: 8, classified in class 435, subclass 252.33.
- V. Claims 1-32, drawn to nucleic acid encoding the lipase of SEQ ID NO: 10, classified in class 435, subclass 252.33.
- VI. Claims 33-35, drawn to chimeric lipase, classified in class 435, subclass 198.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the different inventions are independent chemical compounds and require searches in the patent and non-patent literature.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: a chimeric *Candida rugosa* lipase comprising a substrate interacting domain of the lipase of SEQ ID NO's: 2, 4, 8, or 10; and a on-substrate interacting domain of the lipase of SEQ ID NO: 6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 33-35 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1652

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Y. Rocky Tsao on February 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
